

VT2 TAKEDOWN

17 HMR
22 LR
22 WMR

Utilizing a unique button and lever combination, the VT2 requires no tools, no twisting, and no tightening. Simply depress the takedown button, release the locking lever by pulling down, and the barrel slides effortlessly out of the receiver.

The rifle is then ready to be stowed, or the barrels can easily be swapped to switch between the 22 WMR and 17 HMR calibers.

For reassembly, simply slide the barrel back into the receiver and push the locking lever back up into position.

The VT2 is currently available in 22 WMR and 17 HMR calibers.
